THE PARADE OF THE VETERANS.

COMPANIES OF WOMEN TO ACT AS ESCORTS TO THE VARIOUS POSTS - SPORTING CON-

The true significance of Memerial Day will be brought home vividly to the minds of the people of the United States this year. Somehow during the last few years, especially in the big cities, the real purpose for which the day was set aside has to a large extent lost sight of. anniversaries there has been an increasing tendency on the part of the multitude to give more attention to sport and pastime than to a general ob servance of the beautiful and touching custom of decorating the graves of the patriots who gave their lives for the honor and integrity of the

But this year, undoubtedly, throughout th try there will prevail the truest regard for the spirit which should animate the day devoted to the memories of the heroes of the Civil War. The hostilities with Spain have given inspiration to Americans of all classes Lethargy has given way National enthusiasm, and assuredly there will reflected in the attention and admiration that are being bestowed upon those who are now bearing arms for their country affectionate memories of the men who fought and died that the unity of their country might be maintained.

As usual, the chief feature of the Memorial Day ceremonies to-morrow in this city will be the procession organized by the Grand Army veterans. the demands which the war upon the National Guard regiments there will be only seven divisions in the parade, as against nine last year. MANILA'S BATTLE IN FIREWORKS.

The war, which is so engrossing the public mind, has given Pain, the inventor of startling spectacles, ideal opportunity to make use of the resources at his command, and the news of our great victory at Manila had hardly been confirmed when he at once gave orders creating the most elaborate and co-lossal exhibit he has ever attempted. This has been called "The Battle of Manila," and will be Pain's amphitheatre on Memorial Day night at 8 o'clock. It is Mr. Pain's intention to reproduce faithfully, with novel realistic effects, all the details of that memorable engagement. The Cavité and the arsenal. Twenty ships in full action pass upon the scene, each a faithful reproduction of the originals engaged in the conflict. With startling ingenuity the battle is reproduced, and the effects of the screeching of shells, the firing of cannon and the burning of ships will be sensationally startling, and will explain in a more convincing manner than could be find through any other means the terrors of maval warfare as it really exists.

In addition to this, "The Blowing Up of the Maine" will also be given, and an elaborate pyrotechnic display. The lake will be mined with dynamits bombs, which will be fired by electricity. Cavité and the arsenal. Twenty ships in full as

A smail lot was disposed of at two cents, and then the mill men refused to meet the demand at that figure. They will probably hold on next week for a better price, and it is sale that there is more than an even chance of their getting it. Everything seems to point to better conditions in the market and higher
